PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student and OCI AI Foundations Associate with hands-on experience building full-stack web apps, NLP-driven tools, and computer-vision systems. Skilled in Python, React, Django REST Framework, Flask, Data Structures and Algorithms, OOP, and DBMS. Proven ability to design, build, and deploy full-stack, ML-integrated platforms that measurably reduce manual effort. Seeking a Software Developer, Python Developer, or Software Engineering Internship role.

CORE COMPETENCIES

Python Programming | React.js | Django REST Framework | Flask | Data Structures & Algorithms | OOP | SQL & Database Management (DBMS) | MongoDB | RESTful API Development | Git & GitHub | Oracle Cloud Infrastructure (OCI)

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Frontend:** React.js, Vite, HTML, CSS
- **Backend & Frameworks:** Django, Django REST Framework, Flask, RESTful APIs
- **Databases:** MongoDB, SQLite, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, GitHub Pages
- **Cloud Computing:** Oracle Cloud Infrastructure (OCI) - AI Services, Core Cloud Concepts
- **Core CS Subjects:** Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Exploratory Data Analysis

PROJECTS

AI-Powered Resume Analyzer & ATS Scoring Platform

Technologies: React, Vite, Django REST Framework, SQLite, spaCy, scikit-learn, Axios

GitHub: github.com/rupesh-udayagiri-7/Ai-Resume-Analyzer

- Built a full-stack resume analysis platform (React/Vite frontend, Django REST Framework backend) that parses PDF/DOCX resumes and benchmarks them against job descriptions using TF-IDF vectorization and cosine similarity.
- Engineered an NLP-driven skill-matching engine with spaCy to extract technical skills, surface matched vs. missing keywords, and calculate a rule-based ATS compatibility score, exposed via 4 REST API endpoints.
- Extended the platform with a resume-builder wizard, a job-role recommendation engine, and a 60-question placement-prep module, totaling 5,000+ lines of code.

Smart Voting System with Facial Recognition

Technologies: Python, Flask, MongoDB, DeepFace, OpenCV

GitHub: github.com/rupesh-udayagiri-7/Smart-voting-System

- Developed a secure online voting platform (Flask + MongoDB) that uses DeepFace facial recognition to verify voter identity and enforce one-vote-per-person before ballot casting.
- Built an admin panel for voter/contestant management, with real-time vote tallying visualized through interactive charts.
- Implemented face verification using VGG-Face embeddings with configurable distance-threshold matching to prevent duplicate or fraudulent votes.

Personal Portfolio Website

Technologies: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, EmailJS

GitHub: github.com/rupesh-udayagiri-7/My-portfolio

- Rebuilt personal portfolio as a full Next.js/React application with TypeScript and Tailwind CSS, replacing the earlier static HTML/CSS version.
- Structured the UI with reusable components and custom React hooks, adding Framer Motion animations and an EmailJS-powered contact form.
- Deployed the site on Vercel for fast, publicly accessible hosting.

EDUCATION

- **Bachelor of Technology, Computer Science & Engineering**
KITS Akshar Institute of Technology | Expected Graduation: 2027

- **Intermediate (MPC)**

Narayana Junior College,

Guntur | 2021-2023

- **SECONDARY BOARD**

EDUCATION (SSC) - 2021

Z P High School,

Yanamadala

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) 2025 Certified AI Foundations Associate

Python Automation Certification - Blackbucks Team

Exploratory Data Analysis Certification - FutureSkills Prime (NASSCOM IT-ITeS SSC)

SOFT SKILLS

Problem Solving | Analytical Thinking | Team Collaboration | Quick Learner | Effective Communication | Time Management

LANGUAGES

English | Telugu | Hindi
